# The DPS-4600 improves efficiency in all areas of the supermarket's operation.

## Large Color Touch Screen

The 10.4-inch, adjustable angle color TFT display ensures a good view for all working environments.

## Free-Layout function keys

Users can choose the color and position of the display function keys, according to their needs. This helps to simplify even the most complicated applications.

## Easy Label Exchange

The DPS-4600 has a very simple spooling structure for the label roll. This allows for quick, easy exchange of label rolls in the front-loading labeller.

## Space Efficiency

The DPS-4600 has a front-loading labeller, freeing up space on both sides of the machine for other uses, very important in a busy back room. Only 230mm width of space is needed to install the DPS-4600 single labeller version (330mm for twin labeller version).

Relia

Safe

Speedy

## Easy PLU Searching

The DPS-4600 supports the "Easy PLU searching" function. Searching for PLU (product) file among thousands of different files used to be the most troublesome part of back-room operations. The DPS-4600 helps operators search for PLUs in various ways.

# Accurate

Shoppers want detailed information about the products, such as "place of origin" and "traceability" on the labels. Shoppers also prefer "bargain price" clearly shown on the labels.

The second labeller is completely enclosed in a compact housing for the twin labeller version. The twin labeller can provide freely designed POP labels or supplemental labels to show ingredient or other product information.

## Various Labels, Easy-to-prepare

### Broad Print Width

Maximum print width is 80mm...20mm wider than the existing labels. The wider print width allows more information to be included on the labels to meet labelling regulations while still keeping advertising messages.

# DPS-4600

**DPS-4600**  
Single labeller type

**DPS-4600**  
Twin labeller type

Unit=mm/inches

**DPS-4600 SPECIFICATIONS**
